DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 1, 2005 has been entered.

Claims 1-81 and 83-92 have been previously cancelled. Claim 82 is being examined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 82 is again rejected under 35 U.S.C. 103(a) as being unpatentable over 3,389,051 (Kagan) in view of CA117:239546 for the reasons given in the Papers of September 11, 2003 and April 8, 2005.

Applicants argue that the rejection is based on impermissible hindsight in view of Applicants' disclosure is not persuasive. "Any judgment on obviousness is in a sense necessarily a reconstruction based on hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made and does not include knowledge gleaned only from the

Art Unit: 1614

applicant's disclosure, such a reconstruction is proper." In re McLaughlin 170 USPQ 209. It would have been obvious to one of ordinary skill in the art to prepare a sustained-release topical composition comprising a compound of claim 82, since it was known at the time to use them to deliver compounds for systemic circulation.

Additionally, '051 (column 4, lines 73-75) discloses solutions, which can be topically applied.

Applicants' further argue that the effects of the instantly claimed composition in reducing skin pigmentation rebut the old method of use. This is not persuasive, since the claim does not recite a method of use.

Action Is Final

This is an RCE of applicant's earlier Application No. 09/827,428. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1614

the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
